

Agero Field Information Services

A business opportunity for Agero Service Providers.

Agero's Field Information Services (FIS) is an easy way for Service Providers to maximize their income.

Traveling between locations, Agero's nationwide network of Service Providers is passing virtually every home and business in the U.S. each week. By joining our FIS network, Service Providers can earn incremental revenue by handling asset inspections, verifications, and other routine on-site documentation tasks simply by using their smart phones and/or tablets.

A range of services is offered, and most are designed to avoid or minimize customer

contact. In fact, a driver can perform a majority of them without leaving the vehicle.

Agero FIS is a smart, turnkey way to optimize fleet use and driver time while making the most of your existing mobile resources and capabilities.

» **AN EASY WAY FOR YOU TO MAXIMIZE PROFITS WHILE MINIMIZING DOWNTIME.**

OPTIMIZE YOUR FLEET USAGE WITH THESE SERVICE OPTIONS

- **Drive-By Asset Verification (Property/Vehicle)**
Property and vehicle verifications that take little time to perform, require no personal contact, and involve the least amount of information. The service includes drive-by inspections, asset verifications and photo documentation – each of which can be performed without the driver even having to leave the service vehicle.
- **Onsite Asset Verification & Evaluation**
Onsite services that provide a more detailed assessment of properties, vehicles or other assets in situations when a more thorough inspection and more detailed documentation is required.
- **Transport Services**
Includes non-emergency, non-priority towing, auction delivery, internet purchase transport, body shop-to-auction transport, and other less time-sensitive jobs that allow you to optimize your fleet during downtime.
